Portfolio: waseemalnasser.com

PROFESSIONAL SUMMARY

Full Stack Software Engineer building and operating production web and mobile products since 2022 using Node.js, TypeScript, React, Laravel, and Flutter. Experience spans client requirements, implementation, deployment, and ongoing support, including technical ownership of a delivery platform with 25K+ app installs and 20K+ completed deliveries.

TECHNICAL SKILLS

Web & Mobile: React, Vue.js, Next.js, JavaScript, TypeScript, Flutter, Dart

Backend & Data: Node.js, Express.js, PHP, Laravel, REST APIs, MySQL, Redis, BullMQ

Architecture: Multi-tenancy, background jobs, caching, webhooks, API versioning

Cloud & Delivery: Docker, DigitalOcean, AWS, GitHub Actions, CI/CD, nginx, Doppler, Cloudflare

Integrations: Stripe, RevenueCat, Firebase Auth/FCM/Crashlytics, Google Maps/Places

PROFESSIONAL EXPERIENCE

Deliverit | Full Stack Software Engineer | UAE

Jun 2025 - Present | deliverit.ae

Same role continued from Kemo Digital Marketing; Deliverit platform work since late 2023.

- Took primary technical ownership of a delivery platform with 25K+ app installs and 20K+ completed deliveries, spanning Flutter apps, Node.js/TypeScript services, React/Vue web applications, and cloud infrastructure.
- Reduced monthly Google Maps/Places API costs by approximately 88% (\$300 to \$36) through caching and elimination of redundant requests.
- Redesigned Stripe payments to authorize at checkout and capture on delivery completion, reducing unnecessary charges and refunds for orders cancelled before capture.
- Hardened OTP login after a production SMS-abuse incident using Firebase App Check, request validation, and rate limiting.
- Built a multi-vendor commerce extension with seller onboarding, product variants, inventory, commissions, orders, returns, and fulfillment integration.
- Modernized inherited Flutter screens and user flows; used feature flags and Firebase Remote Config to support controlled releases.
- Managed Docker deployments, staging environments, CI/CD, and production monitoring; reviewed code, onboarded developers, and coordinated requirements with owners and clients.

PROFESSIONAL EXPERIENCE CONTINUED

Kemo Digital Marketing | Full Stack Software Engineer | UAE

Nov 2022 - Jun 2025

Multi-Tenant E-commerce SaaS | 2023

- Contributed to a team-built Laravel 9 e-commerce SaaS using database-per-tenant isolation (stancl/tenancy), merchant storefronts, subscriptions, themes, and payments.
- Automated domain purchasing and onboarding with Name.com and Cloudflare, including DNS management, nameserver verification, and SSL activation.
- Implemented Stripe subscription billing with plan changes, proration, 3-D Secure, coupons, failed-payment handling, and webhook synchronization.
- Automated tenant setup across databases, migrations, seed data, administrator accounts, and default settings, with provisioning failure handling.

SELECTED PROJECTS

Client Booking Platforms | 2025 - 2026

Elite Style Beauty Salon and Rapid Medics

Rapid Medics: rapidmedics.ae

- Independently delivered web applications, Flutter mobile apps, backend APIs, admin panels, booking and scheduling workflows, and payment integrations for two businesses.
- Managed client requirements, demonstrations, changes, deployment, app publishing, and post-launch support.

Cross-Platform VPN Platform | 2022 - 2023

- Built Flutter apps for iOS and Android with authentication, server selection, favorites, speed tests, and subscription-gated access; published Android to Google Play.
- Integrated RevenueCat and Stripe subscriptions with backend APIs; automated OpenVPN server setup, certificates, networking, and registration.

EDUCATION

Syrian Virtual University | 2020 - Present

Information Technology Engineering - in progress

AI / Machine Learning specialization
